What is POMS?

Seamless operational support in Plant Operations & Maintenance

POMS, our Plant Operations & Maintenance Service has been designed to provide quality operational assistance delivering peace of mind, safety, reliability, business continuity and compliance to utilities and back of house. Importantly, it has been informed by decades of experience, to be “simply, better”.

Consolidation of work under a single, competent provider in a Plant Operations and Maintenance Services package delivers known efficiencies, reduces risk and provides a seamless support solution. The cohesion of information, key processes and staff contributes to a far simpler and smoother overall process. The aim of Simmonds & Bristow's POMS is to provide operational assistance that you can trust, relieving the pressures of running your system. **We take care of it for you!**

About Simmonds & Bristow

As the specialist in regional and remote water, Simmonds & Bristow is passionate about using science, engineering and technology to provide practical water solutions.

Our team of highly skilled operational, scientific and engineering professionals put their wealth of industry experience and knowledge to work to solve your water and environmental challenges.

What/who are we providing solutions for?

There are plenty of reasons a plant might need help so our solution has been created to cater to many different needs.

The main plant types that we service are:

- Old plants needing care and maintenance
- Neglected plants
- Plant and operations with poor reliability.

Our services also protect against:

- Long-running skill and expertise shortages
- Regular Non-Compliance
- Reducing Risk for
 - EPO Demands
 - Temporary Environmental Permit.

Having provided these services for several years, we are tried, true and trusted.

What do we deliver?

A general POMS package will include our operation of your plant, along with general maintenance and compliance. Our services stretch from providing operators, to asset management and sampling and testing to ensure compliance.
